www.linkedin.com/in/miyawachrisphine/

Resourceful and technically oriented Computer Science graduate with practical experience in operational support, field technology coordination, and data quality management gained through a professional Associate role at Sama. Skilled in IT troubleshooting, systems support, data processing, web development, and software fundamentals. Known for adaptability, effective problem-solving, strong communication, and commitment to enhancing operational efficiency. Seeking roles in ICT support, technical operations, and software development where analytical skills and technical proficiency can contribute to organizational success.

Experience

2025 – PRESENT

Associate/Sama, Nairobi, Kenya

Reviewed, documented, and improved operational and ICT support processes to ensure compliance with organizational standards, data protection requirements, and project delivery timelines while supporting cross-functional teams and partner delivery centers. Coordinated field and remote operations, facilitated onboarding and technical training on digital tools, workflows, and quality standards, and provided continuous systems and ICT support including troubleshooting hardware, software, and network connectivity issues to minimize downtime. Maintained accurate operational records, performance metrics, and technical documentation to support reporting, data quality assurance, and management decision-making. Conducted research on emerging ICT trends and operational best practices, identified risks and process gaps, and collaborated with internal stakeholders to implement continuous improvement initiatives that enhanced productivity, data accuracy, and overall service delivery.

2024 – PRESENT

Volunteer ICT Technician/Tuhifadhi Mchanha Initiative, Nairobi, Kenya

Volunteered with the Tuhifadhi Mchanga Initiative as an IT Manager, Web Developer, and Technical Support Specialist, managing and maintaining the organization's technical infrastructure, including website administration, data management, and general IT operations. Designed, developed, and maintained the official organizational website (https://tuhifadhimchanga.org/), ensuring functionality, usability, performance, and timely content updates. Provided ongoing technical support to team members by troubleshooting hardware, software, and website-related issues, improving system reliability and operational efficiency while supporting the organization's digital presence and mission delivery.

MAY 2022 – AUGUST 2022

ICT Attachment/State Department of Fisheries and Blue Economy, Ministry of Livestock Farming and Fisheries (ICT Department), Nairobi, Kenya

Collaborated within the ICT Department to troubleshoot and resolve hardware, software, and network issues, ensuring uninterrupted system operations and reliable internet connectivity across the organization. Performed routine system maintenance including software updates, system backups, and peripheral configuration while adhering to established ICT policies and standard operating procedures. Provided user-focused technical support to staff, diagnosing and resolving computer, application, and connectivity problems to minimize downtime and improve productivity. Assisted in the installation, configuration, and testing of computer systems and peripherals, conducted software testing and quality assurance checks to ensure optimal performance, and contributed to the documentation of troubleshooting processes and ICT procedures. Demonstrated adaptability, teamwork, and resilience in dynamic work environments, earning positive feedback from colleagues and supervisors for delivering timely, effective technical support and maintaining high attention to detail.

Skills

- Programming Languages: Python, Java, JavaScript, Typescript, C++
- Web Development: HTML5, CSS3, Responsive Design, Website Maintenance
- Backend & APIs: REST APIs, Basic Node.js
- Databases: MySQL, Firebase, Supabase
- Version Control: Git, GitHub
- Software Development: Object-Oriented Programming (OOP), Data Structures, Algorithms
- System Support & Troubleshooting: Hardware and Software Diagnostics, Network Connectivity Issues
- ICT Operations System Installation, Configuration, Maintenance, and Upgrades
- Quality Assurance Software Testing, Application Testing, Performance Validation
- Data Management: Data Entry, Data Integrity, Documentation, Reporting
- Tools & IDEs: Visual Studio Code, Android Studio, PyCharm, Jupyter Notebook
- Technical Problem Solving
- Analytical and Logical Thinking
- Team Collaboration and Cross-Functional Communication

Education

DECEMBER 2023

Bachelor of Science in Computer Science/MASINDE MULIRO UNIVERSITY OF SCIENCE AND TECHNOLOGY, Kakamega, Kenya

OCTOBER 2023

Certificate for Child Online Protection/ African Advanced Level Telecommunications Institute, Online

APRIL 2019

Certificate in computer packages/ Dandora Computer College, Nairobi, Kenya

NOVEMBER 2018

Kenya Certificate of Secondary Education/ St. Benedict's High School, Budalangi, Kenya

NOVEMBER 2014

Kenya Certificate of Secondary Primary Education / Ngunyumu Center, Nairobi, Kenya
